HARD SKILLS

- Kotlin / Java
- Python / FastAPI / Django
- Spring Boot / Webflux
- Microservices / REST / Kafka
- Kubernetes / Docker / ArgoCD
- AWS / Azure
- PostgreSQL / SQL
- Grafana / Prometheus / Kibana
- GitHub Actions / CI-CD
- Linux / macOS
- Scrum / Agile

SOFT SKILLS

- Communicative
- Collaborative
- Adaptable
- Assertive
- Proactive

LANGUAGES

- Portuguese
Native
- English
C1 — Advanced

OVERVIEW

Backend-focused software engineer with 9+ years building distributed systems and microservices at scale. Experienced across the full delivery lifecycle — architecture, coding, debugging, deployment and mentoring. Passionate about solving real-world problems collaboratively and growing towards a Senior / Staff engineering role.

EDUCATION

Bachelor's Degree in Information Systems 2012 - 2017
Federal University of Paraíba (UFPB) · Brazil

EXPERIENCE

Software Engineer Dec 2025 - Present
Aubay · Portugal (Remote)
Took a customer-facing flight-rebooking backend live in production and own its reliability — error handling, alerting and resilience. Defined the group-wide observability standard and led the OpenTelemetry migration of ~14 microservices (logs, metrics, traces, SLOs). Drove cross-team enablers: Spring Boot 3→4 migration, shared CI/CD pipeline templates and AI tooling for PR and documentation workflows.

- Kotlin
- Spring Boot
- Webflux
- Microservices
- Kubernetes
- Azure
- Grafana
- Kibana
- IaC
- REST API

Software Engineer Apr 2025 - Sep 2025
Talkdesk · Portugal (Remote)
Contributed to feature development, bug resolution, deployment support and process improvement across multiple globally-deployed projects, orchestrating operations across different regions.

- Kotlin
- Kafka
- Event-driven
- AWS
- Kubernetes
- GitHub Actions
- Dynatrace
- SQL

Software Engineer Aug 2023 - Feb 2025
Loggi · Portugal (Remote)
Developed the payment solution processing payments for 8 000+ clients weekly, leveraging 1M+ events. Led architecture, debugging, automation of payment processes, and mentored junior engineers in the financial department.

- Python
- FastAPI
- Django
- Kafka
- AWS
- ArgoCD
- Prometheus
- Grafana
- SQL

Android Software Engineer Feb 2023 - Aug 2023
Critical Techworks (BMW) · Porto, Portugal (Hybrid)
Developed embedded software for BMW vehicles in a fast-paced Agile team, working daily with Android Studio and BMW-internal tooling.

- Kotlin
- Java
- Android Studio
- Gradle
- GitHub Actions

Full Stack Developer / Software Engineer Mar 2021 - Feb 2023
Agap2IT · Portugal (Hybrid) — clients: BNP Paribas, SEF, Timwe, PwC
Consultant on diverse web projects delivering back-end and front-end solutions across banking, government and consultancy sectors.

- Java
- Spring
- Angular
- Docker
- Kubernetes
- Kafka
- Redis
- Oracle DB
- Grafana

Backend Software Engineer Jan 2020 - Feb 2021
LabsIt · Brazil
Built solutions integrated with legacy systems, resolved production bugs and improved existing code across enterprise back-end services.

- Java 8+
- Spring Boot
- Spring JPA
- Hibernate
- Azure Functions
- SQL

Full Stack Web Developer Apr 2017 - Dec 2020
Virtus · Brazil
Delivered web projects for diverse clients — focusing on automated testing, SPAs, microservices and building end-to-end solutions from scratch.

- Java 8+
- Spring Boot
- AngularJS/6+
- Docker
- PostgreSQL
- Jenkins

Full Stack Engineer (Trainee) Aug 2016 - Apr 2017
LSD — Distributed Systems Lab, UFCG · Brazil
Contributed as a trainee to the infrastructure solution that supported the Rio 2016 Olympic Games, building distributed services and operational tooling alongside senior engineers.

- Ruby on Rails
- PostgreSQL
- Memcached
- Docker
- Angular
- Jenkins
